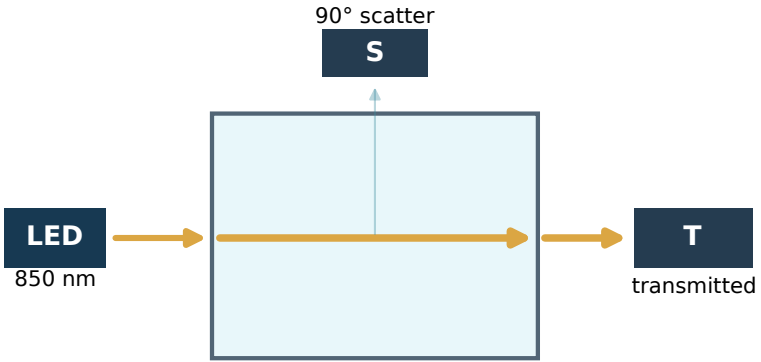
Portable river-water turbidity: optical response

Conceptual comparison — drawn schematic, not a photograph or measured detector output

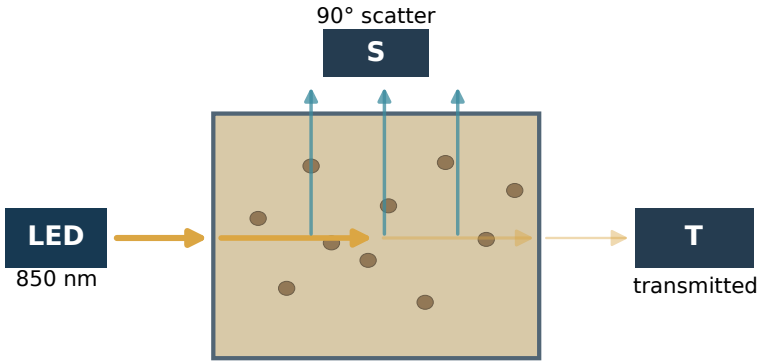
A Clear water



higher T · lower S

Illustrative: T = 0.90, S = 0.10 a.u.

B Turbid water



lower T · higher S

Illustrative: T = 0.40, S = 0.60 a.u.

T = transmission detector; S = side-scatter detector. Relative trends only; particle count and positions are illustrative.
